Reef Trips and Fishing Trips

Special to note Cmes longhairs
Cpus. Islet, size + photo. ~~1/2~~
What has muser in line.

Apr 10 foggy to row to deep hole
on reef for photos under water photog.
so went to mangrove grove, but I
stopped at sand flats first collected
algae of small jetty rocks got amphipods,
Eprathes, etc. (from among green
algae, primarily Ulva. Then worked
north of sand spit over which we
hailed boat in going to reef. →

The outboard was got to working this afternoon
after 1/2 days in capacity. It forced us on a
long row, performed by Desmond first and then
John, back to ship in smallest dinghy in which
one car lock backed screws to hold plate to boat.
It kept jumping out, and over had to be held down
by hand, → with our wt. Desmond, John, Desmond
and myself, and gear + specimens boat was
just few inches out of water + an occasional
wave did slope over in nasty high wind which
is usual here every day.

Had not much fish bent in
middle after I had the R.
Up great in sand then an
white change at night in
after noon

+ Mus Look

Apr. 11 Capt. [unclear] stayed in all night
Reading [unclear] back. No initiative
sitting on after deck, and he showed
initiative exploring cave while [unclear]
out pre-reading. First time [unclear]
left [unclear] and [unclear] on deck
with [unclear] just [unclear] away

Time came up for [unclear] to
find Capt. [unclear] party gone. His
comment was [unclear] may be
only [unclear] left [unclear] that he
be collected [unclear] than [unclear]
self. Last night after
dinner [unclear] [unclear] did
not [unclear] portraits

Apr. 11

Last night Darsie wanted to see Limbo dance, when I heard, had to dress I packed out so did John so Darsie rushed ashore to Crown Pt Hotel where Desmond had arranged. Sir Bus to enquire said we could go without ties but should have long trousers. So we went. The proprietor, Kurt Nottmager knew Busk and gave us all a free round of drinks. In fact 2, I bought 1 more

knew Busk; Plumers Island, Raymond Shannon; old man Schwartz; His sister knows Dowd of Pittsburgh. Had framed autographed pictures of Busk, had met family, boy girl & wife, whom he said went back to old country. Did not remember Banke

Mon Apr. 13. The photographers are all alike when they are invited primarily for photo ability (real or fanned) This a.m. Amos was reading and I asked him to stop cooking galley by stove & get a fan.

He demurred did not like being disturbed at reading. Said (like Sexton) oh I've photographed him several times I said yes, but in the galley. Now, well I said I'd like to have on so/ So he got up and got his flash and did.

April 16. Sits + stands around a great deal, but never
once has washed a dish or filled water bucket for
one but self. Also takes time to sit up never
see again. Took 2 larger kippas + half of
same of them. I mentioned something and
give full attention to woman and her son.
I said fine one on speciality would be
happy to see well preserved collection

but chiding this way. I brought back
first round 5m. The second at
his still sitting and a deck
starting and in rock. He says I brought
back right a time deck with hammer
and cold chisel, I said get old of canvas
but under rock, he came back with
pieces. I thought I had a gift for him
when I spoke to him second time and
asked for canvas cover of boxes with
nothing before. He says he can't
get. I said if it is he resents my gift
then I will be surprised of any. I said
him to look at length time to make
for passing time. He said I think
he did not. He never did list of contents
of boxes in deck; never put up 70%
about board on table; I said I
replenished oil stock. I said
dinner at 5pm. He said well after

What he himself needed, the number
as were half a few spaces
along. Only one did I ever see
his rough stock of honey, cord &
cheese cloth & sewing, one left
a deck when used (same as I did).
Spoke several times of home, but
I did not finally; could not find
nil of Ghedje again. This a.m.
at noon said they are there. Could
not find; I said they may have been
left in town better go look; but
he just ignored remarks.
After asked him to put up
dredge gear for
which I had put in plan to dry
never did. At Buccart reef
anchorage asked him to start that
with sample with maps at day
anchorage. At that time better was
too hard, but there is a good place
I'd, and one has been taken since
I started out again. (But, say, the)

Here this am off Pigeon Id. Here
at 2 p.m. has not yet been done
till it be done. Here looks over
tanks to see if ~~any~~ ^{every} have shifted
or need replacing or retying ^{every} bit
handle, I go around each little
while (even for days or so) but
he never sees need of any of it
even when he fusses but that attracts
attention

Shot box face mark + snubble
have gone a little after a while

Apr 16 Here we are off to the Seign Place
not on Pades.

When we arrived at the Seign Place, the hunter
told himself, every morning that
there for that he may think is there
mosquitoes dope they had heard I had
and it was good and distributed (and
by Jim) before I got my bottle on; I was
landed

Apr. 15-16 The reef this side is
a headwater, large boulders lie
behind; sparse coated with barn
and *Hydrobia* ^{patula} *acuta* *lancea* only
lensed are the flat but poorly populated
got few *hippas* on beach with *acuta*
and *Hydrobia* to *lancea* for *hippas* but
they were common here (Apr. 15-16)

Mr. Carr Brown Reef visit.
Could not find pen, let it
go at that & goe down
lead boat (a small ship) *Russin*
took of *mirrors* dredging left
sitting on boat after deck with *rod* of
an *hippas* & *hippas* beside it
lying on top of weed and water

Apr. 17 In Martinique Fort de France
Everybody rushed ashore. I wanted to go
around for possible mail to Bank for money
for Quin & change for ~~to~~ U.S. Shopping
has the great cry something to take home
Darius did not want to see Blanche's
insect collection. However he did all
of his work via Bank & Blanches
had nice half hour there. Fortunately
I can & he know a lot of people in
Martinique. I richly could not hear or
really understand (had difficulty in following
Blanche) but Com. saved the day.

Blanche gave me two copies of 1956
publication one for me one for library
Desmond ~~brought~~ ^{looked} up Shalie I thought. It
proved to be Charlie son of
proprietor of grocery firm. He had a beer
with us and in his bright yellow truck & a
wagon with iron seats took us to Museum but
too late to see exhibits closed promptly at 12. It
seems. Many new buildings in Fort de France
very modern, should have photoed, only did
a couple of back streets. Went Market
dried inside shop bought jug (Vanilla beans and
cinnamon on sale). Wish I'd bought a little.

Any way invited Charlie to lunch with
us on ship. Lunch started before I changed
clothes and went with an unperfected
Charlie who was busy with his mission.

He furnished Darsie with
all meals + pins (10,000 ^{insects})
He has some black catfish in
which he's kindly brought in
several specimens for fresh water
streams. He's awfully snooty
but I don't get return then
promptly and if I do not do so
promptly he reminds me off it
from day to day. He's using one eye
for his small meals (now cottoned)
He's the guy who went through my
photo bag the day I let him look
in up for me for safe keeping +
next day asked me for spare film
I had in my photo bag too.
Can you hear it?

cultural. He was standing by when I got
up. Charlie had finished his first
helping and I offered him second and
gave him half remaining tuna etc. The
Darsie extended a plate to me, and I
said no you go first (the boys eat
like - and as they want much as
plates, especially after I gave Charlie
some of what remaining on each plate.
Then I gave plate back to Darsie and
said you go first, he said loudly I
don't see anything to eat. I said
here you take this tuna and
I showed a fair portion of his
plate, some onion (he yelled) for I
didn't let him give him two slices
of tomato, all cucumber and helping
of lettuce and couple pieces of bread
saying work has more of everything, he
got get it, so I did, as they can
of tuna + sliced tomato. Then I ate
a helping of tuna. Desmond took an ad-
ditional helping of same + I gave
Darsie on his plate, couple more slices
of tomato, after giving Charlie some
had had more helped Darsie got the 2 slices
rest had left. But regard seems to
be had by young fellow Darsie is 44
Appa + all Bowman for the money
after. I never saw him a bunch

paid by Desmond
 out: 2 B. weel.
 gun B. weel.
 beer.
 17.00 US
 2.00 US
 15.00 B. weel.
 15.00 B. weel.

for patching into food without
 thought of anyone but himself
 + Halverson short of disapproving
 ment, at food left for him to take
 was an insult. He must try when
 it came out more is provided. +
 moreover he could have kept his mouth
 shut and made the best of what was
 left. It would at that time have been
 just his meal he ever had around
 here, and would not have hurt him.

The American Consul was entertaining in-
 spectors (for State Dept. by name) out
 to greet us. One of his girls included
 Mr. Blagden for me and we went around
 to see him. Overed to be latter of
 small boys who will be in
 Gloucester Pt. this summer.

I said in starting to expose ourselves
 (getting ready to go. "We should get now
 thing inspectors will be going through your
 desk drawers. He said they've been
 by through he came out to see us
 in open 3'd floor court of Consulate.

And went off on a less by himself
 out to market & buy shopping for his
 kids

I guess we got off at 2 p.m. as
planned — got in late afternoon
at Roseau (early evening)
too late for clearance.

Hesmond, has to pay for his
camera in Dominica (Rolliflex)
I think I'll get one too.

We are heading north on a really
smooth sea, due lee of Martinique
is and very quiet.

Desmond bought camera for me 17.

April 18

The Free Lance came into Portsmouth
 about 4 p.m. Had aboard a party of
 about 7 of whom is mine for a long time
 on cruise. Desmond went over to see me
 they served me a cold drink.

One man named Vaccin asked
 about English Clark, said he'd brought
 up about 4 gallons of formalin for her
 when he was working in the Red Sea
 and said he knew Kelly

April 20 aphone at Inupiat
got key also 20 to 12 when egg
thing closes. Rushed in to see
Administrator, robust tall young
Englishman. He called Peter Lake
and the vestry officer. Latter side
getting over ghostly flu. Among
things Peter Lake said 130 to 200
for us to return. He did one drum
to dock before we went back to
him & made all arrangements for
Caman; ~~the~~ told us to return at
at 2. He urged and finally
got lunch started at 12.45
to him. Sube soon arrived told
us of his fish boat Capt.
George Roberts re from
fish

April. 19 Sunday morning John & I
went pulled traps, one of mice most
peaceful morning yet. One trap
all rolled up in dirt, but and in
150 lbs though not getting much had
in but a part of a 2 and a half
little red snake of 2(?) and a few
Sas and a talus are early coffee

April

249
That day ago I rearranged all
April 20th I was out after deck
everything, this afternoon I
ask

stupid while I was
alcohol and arranged
to have cases of
fresh bottles at hand
he was sitting on after
deck reading while
I washed bottles.

used quarts, to be used again
but last evening he had used
but emptied out his little
supply carton on top deck without
washing or running them.

Both Anne & I are mad at me
after searching around and me

without help
I'm sure I'm
doing it bet.
Whiplash
he later asked
an investigator
what had been
done

April 20 contd Robert story

April 20. Motors repairs etc
were n.g. beyond repair for
in gutter. Harry said

Fox Bay beautiful place low
in middle wide expanse of black
sand beach, many holes in it amphipod?
worms mollusks.

Amos got Ocyropsis. half doz. for photos

Boulders were bare, but got
amphipods from underside rocks. &
in coarse sand below

with poorly bedded shale
like conglomerate at either end
one sizeable algal patch about
a foot under water.

Lots of local residents bathing

Ideal place for resort hotel have air
strips.

Need push
net here

Apr. 22. As we got in early, we
could not get harbor master and
finally Harlan finally got a
license + Desmond went to Angl.
Hbr. Amos went ashore too
Amoy when I went at 2:30 p.m. to
see Administrator, I gave up
Amos and visited him along + then
to "governor" he told us of a
Banyan Army Engineers, + he
and the last Dept. Engineering. Amos
called the up + I went to see the
man. Amos after seeing adminis-
trator we went to Nicholson office
across street from the Lynde Lab
where he made final arrangements
re lecture Africa on Friday 1st
January on 4th May. Mon.

After I got back to Nicholson
office Amos confessed to me he didn't
see a ship. but it was too late to see
Whys. Dr. Amos took him to ship.
He thought he had ulcers but
didn't know before. Sh. thought
it was ulcers, Amos said he

Barnd had one since 20 yrs ago
ad also confessed he had hanta
passing urine, did you tell H. His
gun was no. Any way the Lt
Lt came in for the test
on Thurs & Friday. When out
him out of flying to Barnd
with us. He spoke of flying
Friday if H. would let him.
I tried to discourage it. Said he
felt attacks as far back as martin
age but didn't tell Barnd had head
aches for last 5 days; etc.

Then went ashore at 8:30 to go
to hotel for next several nights
with cameras, & bottles (2 packs, heavy
as lead). Elvise said he
had a severe (a bad) attack just
before this & feared it would keep
him from going, told John

This August with a lot of R & D
 Amos I am sure would have not
 stayed behind if Dr. Radin had
 scare in him for even spoke of
 coming over later by plane is Dr. Cleared him
 think it is a damn dirty trick by
 being afraid to go to Dr.

It's last time I take any more with
this Certificate of O.K. to travel,
+ not to tell any body, except
Lennie Kerner of which type
time. + then not tell my in-
house. or Lennie with its
hard new hospital.

harder and happier.
 So there something were to
 happen in an out of the way place,
 make me madder all time when I
 think of it, accepting free ride when
 he might get sick at any time.
 It's bad his so selfish.

He was afraid to go to H. for fear
H. would not let him go on
trip.

Angus went ashore & left
no instructions re flash exch-
ment (his own & demand is afraid
to use Angus personal flash. He (Nes)
has one life in

So I thought of using rubber
groate flash lamp holder &
buy camera then I will
save the day for us -

pg. 24

Barly gave will always be impressive
in naturalist's nature ever, and ever
curious visitor. Desmond measured the
edge to bottom and got 72 feet for mean
cord (Finlays no. 42) and tied rock on it
+ let down, and tied ^{with} end to rest of coil, not
idea of pulling it down when he found it
helpful. He did + he pulled but coil dropped
into tall slender palm ^{cray} 40 feet up. Heavy
coil dropped into ^{cray} of palm so that
cord was practically smothered there, vines
crossed among stems of leaves. Desmond
tugged + tugged + palm bowed and swayed
+ bent but he got finally had to back it
down with machete and things tall 40-50 ft
and 5-6 inch in dia. was as tough as
~~new~~ wire nails but finally it was through
but fell into tops of other trees and out
(+ it was heavy) down + later with Desmond
help had to work + lift base over rocks
and ~~was~~ ^{was} it back till tree fell. It was
heavy as lead.

Ch. of stalagmite Bud hole quite
in center. about wide and deep.

shred soil & debris into bags full
on ground (the big bags full things
put in which I have used for hit
away.

Apr. 23 to Darby Cove 10 30
2/3 way by tractor! arr. noon
return 3:00 - 3:30 took tractor.
arr. Inn about 4 p.m. Dea ar
5 30 Stopped up lagoon & ref. =

wonderful man singing.

"Cave" are drier than before + few birds got (John) 2 sp. shells; 3 skins;

On 22nd Apr by plane to also
I saw 2 sacks of dog's droppings
scorped out of hole discovered by
Cowan in Loh. Cowan got 2 fls
from it, not all of vegetation.

Apr. 24

Apr. 24 Break. 6³⁰ ashore at 7³⁰
Sr Dark cave. Rising in sea after
easy launch in bottom. Srs of the
flash light in cave. One almost
turned over. Better than house
3 hr. wait
deeper than alive with amphipod

Caravan must have passed on
road about 2 weeks were due to
end of cruise but 2 bottles with oil
in tips left in car in little of Caravan
3 in 1 left at there too.

Left Caravan of qts on deck but
high; also Caravan spare made
by Doug of O'ford but pen
worked fine a.m. Caravan was for 22
22 or 23.)

When getting things shut, & writing
label for his stuff I found when
wrapping at his elbow the Johnson
I'll need a label to write his name
but it is a great of my side & when
he got to work; even if he didn't
me, should have offered a pen
of label, but didn't. Just found out
beyond immediate personal needs
Re 70% of full not for things
hunched before samples as some good
Cubed oil things & bushes should be kept free
one he had called back on house as much for the

25. ^{US} Very successful shore all
all hands on lagoon B. white
I was in beach at 8 a.m. missed
us last night. Cut up sponge

Monday saw ^{Soggy head} the headman one in
8 mos. was about X
He and Desmond after 4 p.m. did
duty in 1-2 mos off Caravan P.R. with
Horgan.

Got George Smith a couple of small
spring lobsters. + 2 Lima

movement as rest preventative

26. After an
collect all hands
stayed around
(to check and if
change
light
did not
run I
more)

Winter got
Flash light battery
asked for refill
got me a new battery
took my pen zinc
oxide home seen me
Air envelopes
note paper to Enam
for cash
enamel home from 2

April 28 Left Barbuda 8³⁰ a.m. a. 27th
arr. off Eng Harbor at Daybreak, then went
on Dick's side

All day harped on school coll. ~~the~~
saw around 11⁰⁰ 430 till Desmond & Gra
started reefward then he & I went coll.
After this wings taken and he had
to make up school coll. & I said if you
had collected more when you were out
collecting you'd have it by now. He
replied I gave you all I got! &
I said all we lost of you was
a large *Cult. anassa* (at Bueor
shore coll. in sand by mangroves
mean you never went equipped
to do extensive coll. face mask
on side & bag (one of our muslin bags)
got a *Phyllonoma* on Bueor, which he kept
I was not particularly interested
got dried under red sponge which
we never seen since it came aboard
Just 2 of my collecting. *Hippas* 2 larvae
of lot of 6 or seven, for photos & never
returned; when I said one fine ago it
was he said if some one could catch it
on water. He said he had a nice

27th last night tried use
just dirt net to try to get
couple of hammered organisms
at about 8 p.m. after
in water. We gave up vent
after 1/2 hr. - didn't handle any
below. Learning to ring small
sail & net started going
across ledge with shapable over.
for just before mentioned it
I moved in after mentioned it
left in way of traffic.
being

28th tonight wanted to go to
reed. I had bucket of water in
deck. One wanted was in it &
dumped water over board. So I said
you might fill that again with
fresh water. Except for his own use
I don't believe I've ever filled it

collecting (which I have never seen) because
I said that it would make me
very much happy.
that Amos does well. In 1/2 hr. he
daring wouldn't fill a pint jar.
every thing is added.
So couple of oysters for Bob &
by default, left in bucket on deck
that they in boat later in evening
when I pushed I'm now beginning to
hurry to for Amos. He (Amos) took
& picked them, and got shirt, tucked
with black ^{put head} ~~down~~ ~~on head~~
on deck where it stayed another
day or two

After ret. from collecting I
said to Sam, 'you'll look after
damp collecting?' He said yes but
he left Amos bucket under
& unlabelled

I had told Sam weeks ago
in any body to put a tray on it & hang on
each time needed. So today I had

get hay (I fixed up, cartons it
is) for use (labels etc. which
which had been kept in it was
not there, so I asked him, was
on his hands, had got it, so
I went as I wished to wear
repellent clothing.

At night Desmond took
Larsie up to his home.

After dinner I saw again brought
up extension of time to finish studies
(Cultures) I told him length of his
studies in time & that he was making
limits and should have planned
his work to fit; and that I should
have been told of nature of his
important work, which he was very
to think for himself at this (time)
& suggested to write Thorndike & Port
Rice, which he did by a very
good letter. Had got a very
letter head for which he asked me.

Under if I have to take ^{Photo}
at Rodney's house had only 3 used
in it,

2nd If Larsie had come
back promptly with hats for Rodney's
we could have finished off work
in afternoon, but there was no
way of reaching him.

Comrade told Anne secret of
long line is his fresh bait
with ³ meat stripes ^{as} bait
if of good sized perfect ^{strip}
not ^{one} 1/2 hour in water, as value
increased. The more is to
state. Should be reference of

April 29. Bad Air to day
Went this first time but
did not turn out as well & was
2nd for 1 hr with Mrs. Nicholson

First time I got 5 of 12 bats
collected by party of 4 plus guide
Hansie & Son. Little, Hansie
Hessman & I caught in all
net large size trout & similar
from trap of different net. Hansie
sized nylon & traps along 3
I had 2nd 3 different for bats!

Apr 29th In Am

May 2nd Amos is queer as hell
This a.m. gave me a sealed en-
velope saying "here is an account
of my expenses and money left
over from advances. I don't need
his vouchers and I'll give him
+ we squared money back to
forth and about mining petty charges
and ~~bonuses~~ we plan to do a
little bit [I owe him 13.00]
for an account that's out of the note
why could he be frank. — I can't
open. Dave found him constantly
evading an answering never
direct answers questions but
to him, usually comes into another
or or ass remains beside the point.

May second this a.m. Anne
passed up eggs + had her
heartful of I asked are you ill
are you hung on the if you
scurrying affairs. "Oh no
this is something different." her
same aches and pains though.
Really has been of no use to
me since with mess little, he did
~~photo~~ ~~collect~~ ~~case~~ ~~was~~ ~~in~~ ~~relevant~~ and could
have been let go, because the
things he was requested to do
and didn't, were far greater of.
And to mess for picture about 5:30 p.m.
Saying if he felt too sick I would forget
~~and~~ ~~go~~ the request.

Said he had pictures of the mud
and thought that of had wanted
above water pictures. I had
spoken of it at least three
times at meal times and to

him a fourth time man to man
as a picture I wanted to publish
with account. Demonds success
with tube coupled with his keen
powers of observation and interest
passed off and on all day have
only personal letters and again
to do.

Tom reads at night
when he is lying in bed over his
or electric light fish. It has
Cowan who used to be at line
over steam and got mess of
hydrates. Also Cowan was
only one + first one to help fine
root. Then only did Tom
take a band.

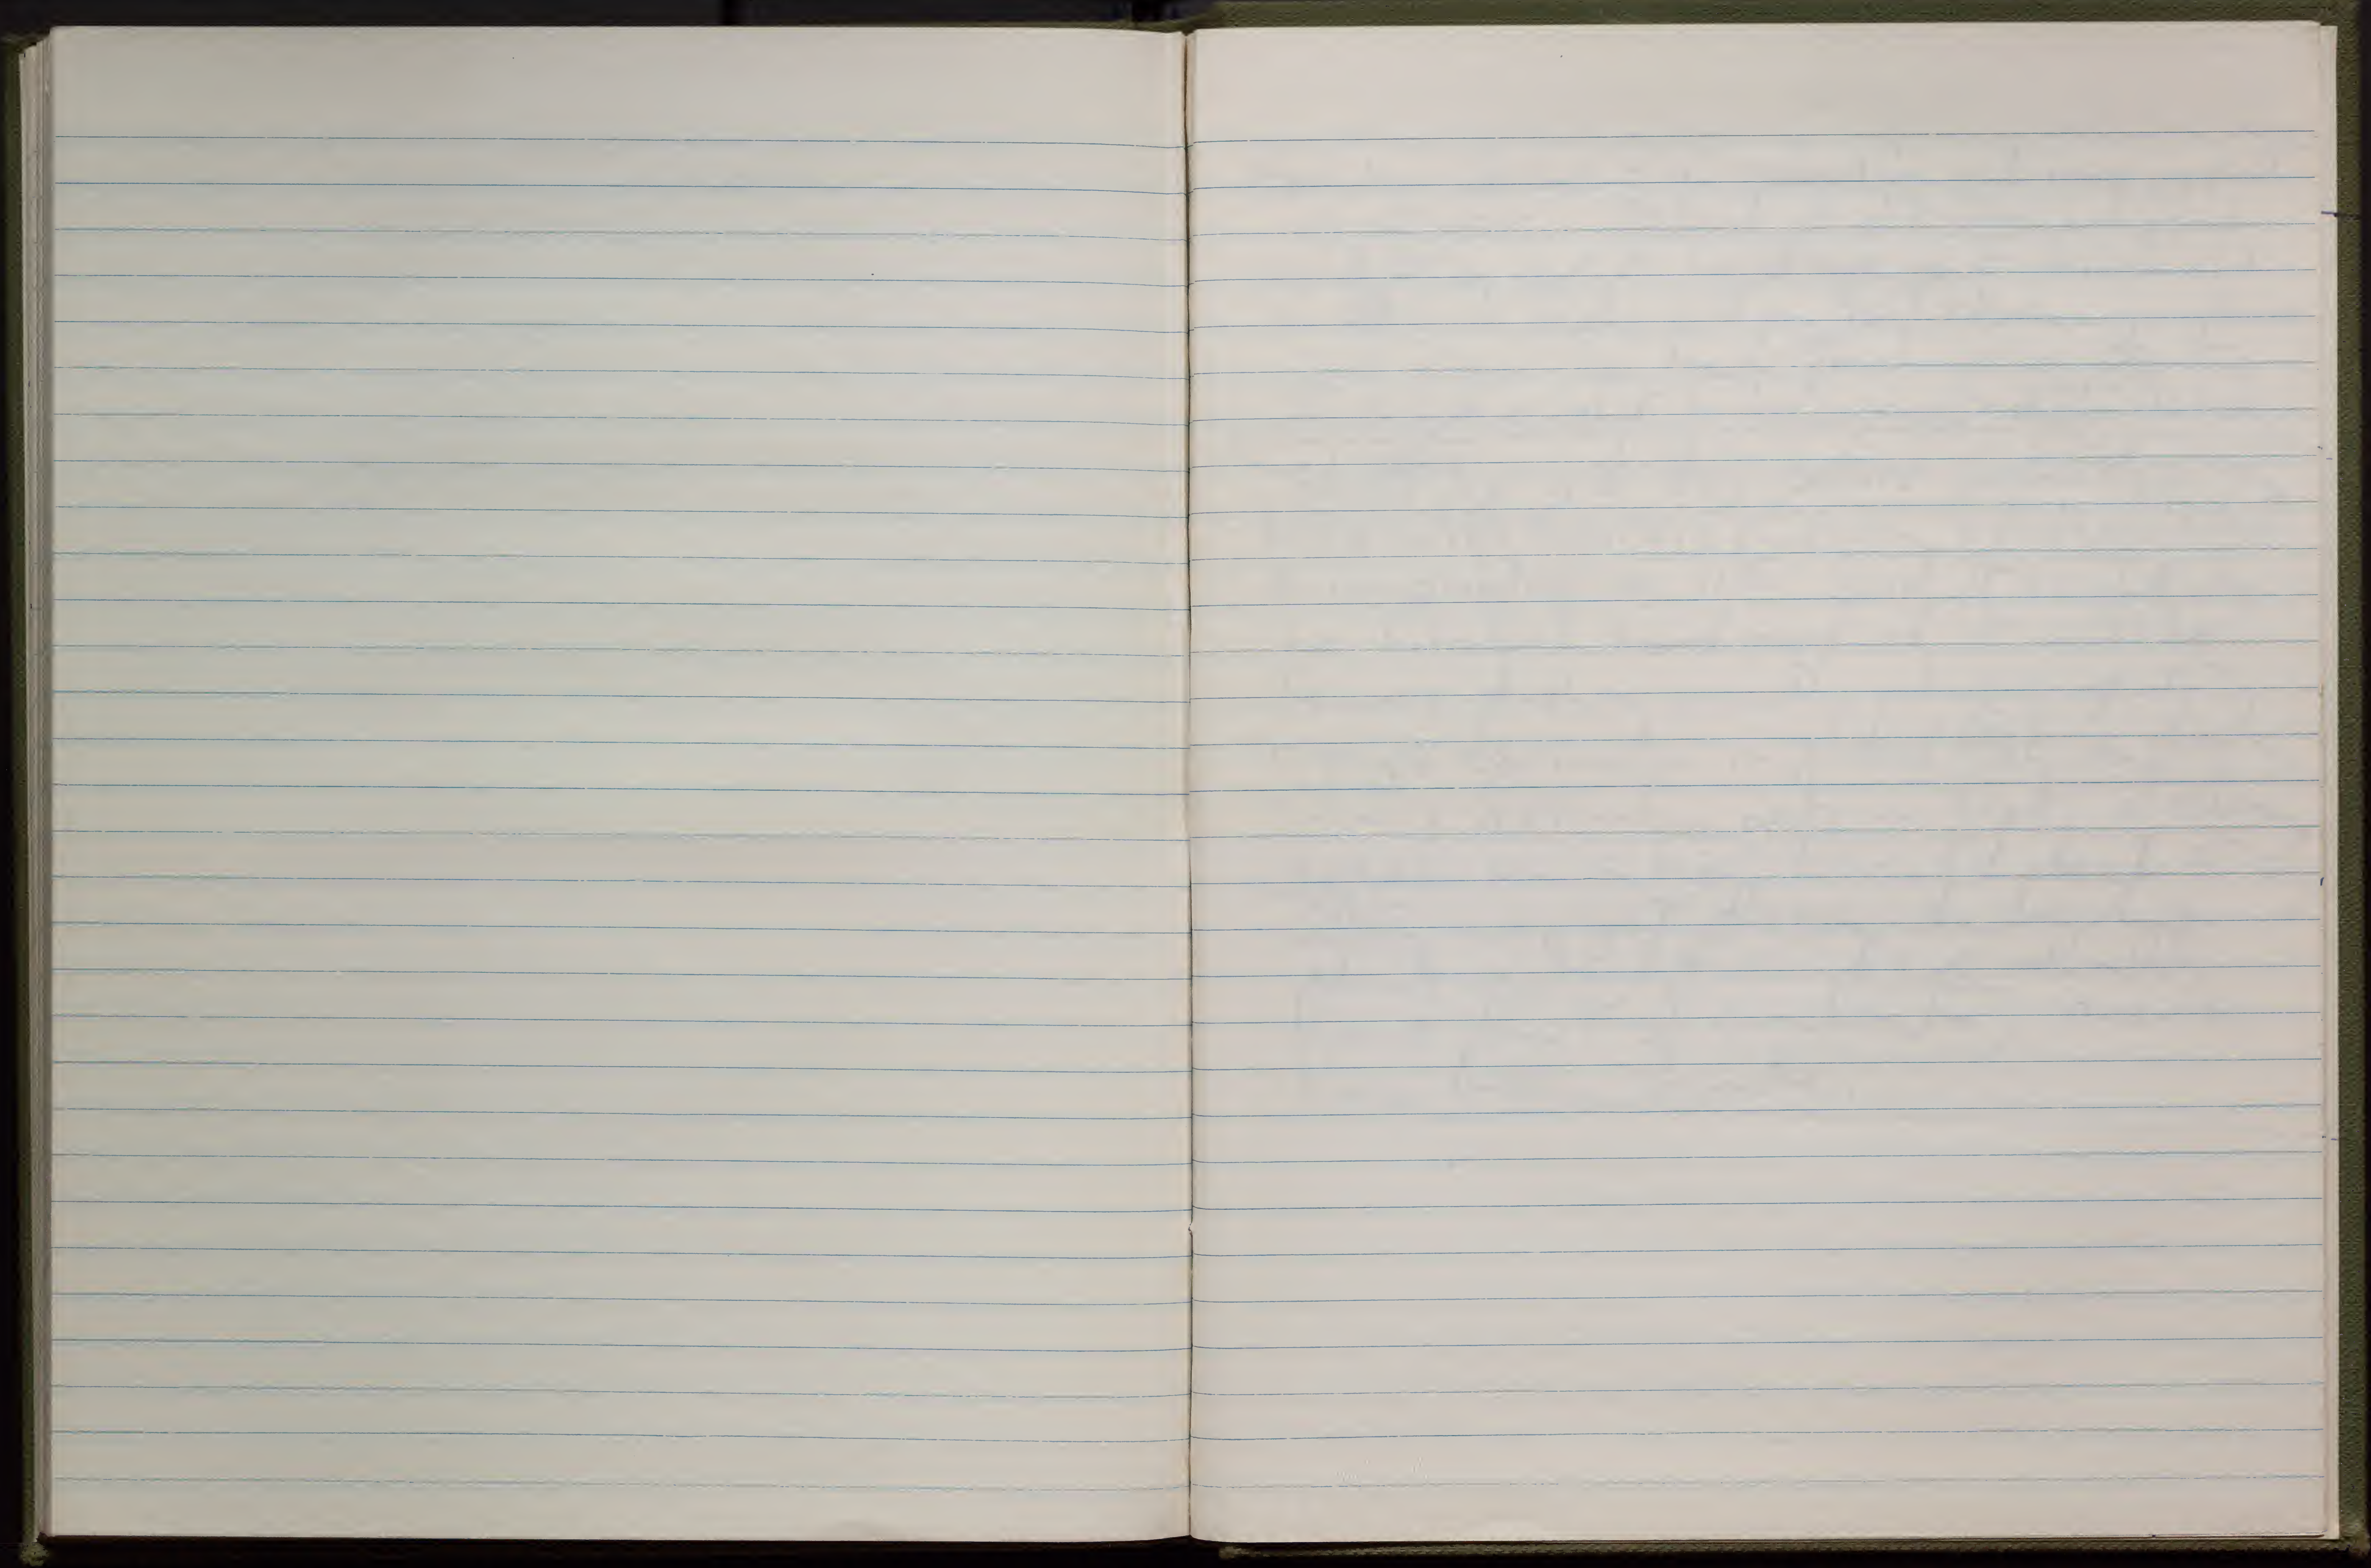

Had rain in a.m. These
sudden hard showers from
north while they last are
of altogether too short a dura-
tion at least at this time of

year. My season job is but when
you do your picking on deck, can
be very interfering.

Weather continues lovely, rather
warm in day, here on water.
6:15 just had one of those hail
passing showers, last night 76 was
high low, and this am 6:15 = 78 in
yesterday was 88°. Rather cooler
in one time.

Hosmond went out and got
several unusual shrimp, and
a tail longer which did
taking these was beyond our
photographer.

Amos plans a book on
Crustacea as he's done for
fishes & and worms. I can
see it in his attitude to the
side of job.

Apr. 11. Seine fish asked to put away, put
in qt jar. Asked if slit stomachs, no
said it ought to be done put 4 inch slit
in 8 inch fish; then tail stuck up above
jar rim $\frac{1}{4}$ inch perhaps on slant.
I said ought to be wrapped ^{in paper} in tank,

stuff he got day before yesterday on
hike with Darsie & Cowan still unlabeled
& unpickled on 11th. Said it ought to
be labelled ~~said~~ replied it will be.
Leaves dishes usually where put
wraps formalin injected fish on deck
where formalin gets on deck I always
wrap in a bag to catch drip I say
After we got boxes dumped
unpacked I said we should
have list of contents; none
has been made.

What did Capt. think of sharp (needle-
like and glass \pm fragments of coral on
deck after cracking and sorting. I
thought he would down them as I did
whenever I stepped on one. But he
said "I'd call it an occupational hazard
wrapping formalin injected fish and
instead on in pain. I'd better not suggest
just won't take when proposed though
may do later.

Reversible label (pad) or pcs masnite
screwed on; reverse to carry U.S. D. Bear
N.Y. Address:

Dredge with bottom that Latches
on & off for easy dumping. With that
bolt on like skis and various teeth
and blades to bolt
Smaller than $\frac{1}{4}$ inch mesh. — an

Small self contained wind & cable
small ^{auxiliary} engine mounted on same base

Lock box or folder note book size
make lock which have to unlock.

Box with desk inside
Box with Tools & med. supplies
Aquarium box & pump & aerator
hoses?

Big equipment Lock boxes
Aquarium tank and a big hood
etc
glass jars marks

Bottle boxes quarts (gallons?)
8 oz
milk

Jars 16 & 8 gal.

Safe, dissect - Babak,
Project (still, movie)
